

# St. Matthew's Environmental Club

Who? Students in grades 3-5  
When? Wednesdays from 2:45-4:00pm  
(We will try to meet once a month from October through May. We will meet for the first time on October 19.)  
Where? St. Matthew's Science/Art Room  
Cost? \$15 per student

This club started last year, and Mrs. Beth Ziel (5K teacher and clubs coordinator) will be leading the club once again. We hope to instill in our students the need to take care of the beautiful world God has created for us!

During club time we will continue to look for ways to be environmentally friendly in our homes and at school. We will complete some of the recycling and reducing waste activities we started last year. Global environmental topics will be discussed also.

Because this is a year-long club and schedules for later in the year may be unknown right now, it will be fine if a students needs to miss from time to time. We will still keep those absent up-to-date and allow them to complete projects and help at a different time or in another way. **If your son or daughter is interested, please have him/her register, and we will work around schedules as the year progresses.**

All interested children will need to provide the completed registration below and the \$15 fee to the school office by Monday, October 3. This club will be limited to 15 students.

The children may bring a quick snack to eat each time before we begin.

Please send any questions to Beth Ziel ([bziel@smls.org](mailto:bziel@smls.org)).
